How do I add a subdomain to my hosting account?

Add a subdomain to your hosting account:

1. Login to <http://dashboard.brownrice.com> with an email address that we have on file.
2. Click -> **VPS Hosting** -> yourwebaddress.com **Manage** (green button) -> **Web Sites -> Add new Web Site or Subdomain to this VPS**
3. Follow instructions.

Now Add the DNS entry for your subdomain:

1. Click -> **DNS**
2. Select your domain name and click -> **Manage DNS**
3. Click -> **Edit DNS Records -> Add DNS Record**
4. **Add your subdomain in the Hostname Field.** i.e. If you are setting up "dev.yourwebaddress.com" you'd enter "dev" in the Hostname field
5. Change the **Type** a **CNAME**
6. Enter your domain name in the **Address field.** i.e. If you are setting up "dev.yourwebaddress.com" you'd enter "yourwebaddress.com" in the Address field
7. Save

Done!
