

# Email

## How do I configure Thunderbird for email

Mozilla Thunderbird Email Settings

Download Thunderbird [here](#) .

### Step One:

Open Thunderbird and click **Email**.

### Step Two:

In the prompt that appears, click **Skip this and use my existing email**.

# Email

## Step Three:

Enter your Name as you would like others to see it when you send an email, then enter your full email address and password and click **Continue**.

## Step Four:

Thunderbird will try to automatically identify and populate the fields. Once it completes, click on **Manual config**.

## Step Five:

For both incoming and outgoing Server hostname enter **mail.brownrice.com**, then enter your **FULL EMAIL ADDRESS** in incoming and outgoing Username fields.

Then click **Re-test**, if this passes the test, click **Done**. If this fails the test, please double check your username/password/hostname settings and try again.

Ta-Da! You are now done and can start sending and receiving emails!
